PROFESSIONAL SUMMARY

SOC L2 Analyst with nearly 5 years of experience in 24x7 SOC operations, incident response, threat hunting and detection tuning. Investigated 400+ high-severity incidents across endpoint, email, identity and cloud. Hands-on with Splunk, Microsoft Sentinel, Devo, CrowdStrike, Defender XDR and Trend Micro XDR. Skilled in SPL/KQL, MITRE ATT&CK and SOAR automation.

KEY ACHIEVEMENTS

- Investigated and contained 400+ high-severity security incidents involving phishing, malware, ransomware, account compromise, and data exfiltration.
- Reduced MTTD/MTTR by 30% through SIEM detection tuning, correlation-rule optimization, and SPL/KQL query improvements.
- Reduced vulnerability backlog by 95% through CVE/CVSS-based prioritization, remediation tracking, patch validation, and rescanning

TECHNICAL SKILLS

SIEM & Detection Engineering: Splunk, Microsoft Sentinel, Devo SIEM, SPL, KQL, Event Correlation, Alert Tuning, Detection Rules, Use-Case Development
EDR/XDR & Endpoint Security: Trend Micro XDR, Microsoft Defender XDR, Microsoft Defender for Endpoint, CrowdStrike Falcon, Endpoint Investigation, Endpoint Isolation
Incident Response & Threat Hunting: Incident Triage, Incident Containment, Root Cause Analysis, Malware Analysis, Phishing, BEC, Ransomware Investigation, IOC/IOA Analysis, Threat Hunting, MITRE ATT&CK
SOAR & Automation: Splunk SOAR, Devo SOAR, Playbook Development, IOC Enrichment, Python Scripting, Workflow Automation
Cloud, Identity & Email Security: Microsoft 365, Microsoft Entra ID, Defender for Office 365, Risky Sign-ins, OAuth Abuse, MFA, Conditional Access, Email Header Analysis, SPF, DKIM, DMARC, URL and Attachment Analysis
Network & Endpoint Telemetry: Windows Event Logs, Sysmon, PowerShell, Firewall, Proxy, DNS, VPN, DLP
Vulnerability Management: Tenable.sc, CVE/CVSS Prioritization, Patch Validation, Remediation Tracking, Vulnerability Rescanning
Threat Intelligence & ITSM: VirusTotal, AbuseIPDB, ServiceNow, Jira
Security Frameworks: MITRE ATT&CK, NIST CSF, ISO 27001

PROFESSIONAL EXPERIENCE

Principal Engineer (SOC L2 Analyst) | Wissen Infotech Jan 2026 - Present

- Triage and investigate 5+ escalated high-priority alerts per shift, correlating endpoint, email, identity, network, and cloud telemetry using Devo SIEM/SOAR and Trend Micro XDR.
- Investigate phishing, ransomware, BEC, account compromise, and brute-force incidents; coordinate containment through endpoint isolation, account disablement, credential resets, and IOC/URL/IP blocking.

- Investigate Microsoft 365, Microsoft Entra ID, and Defender for Office 365 alerts involving risky sign-ins, OAuth abuse, MFA fatigue, and mailbox compromise.
- Correlate Windows, PowerShell, EDR, firewall, proxy, DNS, VPN, and email telemetry to determine incident scope, identify IOCs, and reconstruct attack timelines.
- Perform root cause analysis and develop 6+ SOPs and knowledge-based articles covering phishing, endpoint, and identity incident handling to standardize response across shifts.
- Support security monitoring and incident response operations in a 24×7 SOC environment covering 5,000+ endpoints.

Security Analyst (SOC L2) | Novo Nordisk May 2022 - Nov 2025

- Investigated and contained 400+ high-severity security incidents involving phishing, malware, ransomware, account compromise, and data exfiltration.
- Improved MTTD/MTTR by 30% through SIEM detection tuning, correlation-rule optimization, and SPL/KQL query improvements across Splunk and Microsoft Sentinel.
- Developed 8+ Splunk SOAR playbooks for IOC enrichment, alert investigation, and notifications.
- Tuned 20+ detection rules, reducing false-positive alerts by approximately 30%.
- Conducted proactive threat hunts using SPL/KQL queries, threat intelligence, and MITRE ATT&CK mapping to identify suspicious activities and attack patterns.
- Investigated endpoint activity using CrowdStrike Falcon, Microsoft Defender XDR, and Defender for Endpoint, analyzing process trees, command lines, file hashes, and network connections.
- Investigated phishing emails through header analysis, SPF/DKIM/DMARC validation, malicious URL and attachment analysis, and sandboxing.
- Automated security reporting and data-processing tasks using Python, reducing manual effort by approximately 40%.

Management Trainee | ICICI Prudential Life Insurance Oct 2021 - Apr 2022

- Monitored security events, performed initial alert triage, and escalated potential incidents to L2/L3 security teams.
- Managed security incidents and service requests in ServiceNow, maintaining incident records and supporting root cause analysis documentation.
- Supported security investigations, remediation coordination, and audit-related activities

PROJECTS

Enterprise Open File Share Vulnerability Remediation | Novo Nordisk

- Drove remediation of open file-share vulnerabilities, cutting the backlog by 95%.
- Coordinated with infrastructure teams to review permissions, track remediation actions, and validate fixes through follow-up scans.
- Created knowledge-based documentation to standardize remediation and validation activities.

CERTIFICATIONS

- Microsoft SC-200 (Security Operations Analyst Associate) - In Progress

EDUCATION

- PGPM (Information Technology) - ICFAI Business School, Bangalore | 2021
- Bachelor of Commerce (Computers) - Aurora's Degree & PG College | 2018
